Copenhagen Helicopter and Electro.aero Announce Strategic Partnership to Advance Electric Aviation Infrastructure in The Nordics

Copenhagen, Denmark – 7th of August 2025 – Copenhagen Helicopter, Denmark’s leading pioneer in green aviation research, has officially entered into a strategic partnership with Australian technology company **Electro.Aero**, a global leader in the development and manufacturing of electric charging solutions for aviation and other high-capacity transport sectors.

Under the terms of the agreement, **Copenhagen Helicopter becomes the exclusive intermediary for Electro.aero's innovative electric chargers and support services in The Nordic market**, which includes **Denmark, Sweden, Norway, Finland, the Faroe Islands, and Greenland**.

This partnership marks a significant milestone for the growth of sustainable aviation infrastructure across the region.

Electro.aero's state-of-the-art charging systems, originally designed to support electric aircraft, are also ideally suited for electric **trucks, buses, marine vessels** and a range of other electrified transport applications.

Explore the cutting edge of sustainable aviation at the Roskilde Airshow, August 23–24.

Electro.Aero and Copenhagen Helicopter will together with electric aircraft developers Væridion and Electra, demonstrate their latest charging solutions and answer your questions about the future of electric flight. Join us and connect with the technology shaping tomorrow's skies.

*"This partnership is a natural fit," said **Martin Andersen**, CEO of Copenhagen Helicopter. "Our commitment to green aviation is perfectly aligned with Electro.aero's cutting-edge technology. By bringing their electric charging systems to The Nordics, we are taking a major step toward enabling a fully electrified future for air and ground mobility."*

Electro.Aero CEO **Joshua Portlock** added, *"We're proud to partner with Copenhagen Helicopter, whose leadership in green aviation makes them the ideal representative for our products in this forward-thinking region."*

With this partnership, the two companies are positioned to play a transformative role in accelerating The Nordics transition toward sustainable transportation and renewable energy integration.

About Copenhagen Helicopter

Copenhagen Helicopter is a frontrunner in green aviation research and development in Denmark, spearheading innovation in electric aviation and sustainable air mobility solutions.

About Electro.Aero

Electro.Aero is an Australian-based technology company specialising in the development of high-performance portable electric charging systems for aircraft and other demanding mobility applications. Their chargers are deployed globally to support the future of electric transport.
